

Please see comments filed in opposition to the NCI Petition RM-10786. I am opposed to this petition on those grounds.

Compromise petitions exist which allow for HF access to no-code Tech Plus class with all the benefits to the no-code people. They retain Element 1 testing for General and Extra Classes. These compromise solutions stimulate business for vendors, keep a manageable enforcement potential, enable better evaluation by the Commission, and still keep telegraphy testing for the two highest classes. Therefore there is no additional benefit to eliminating cw testing completely other than to satisfy special interest groups.
